Becker Engineered Systems Announces Heather Hotlosz as VP Finance and Business Analytics

CINCINNATI (May 30, 2023) – Becker Engineered Systems is thrilled to announce Heather Hotlosz has joined the team as the VP of Finance and Business Analytics. Hotlosz brings more than 18 years of experience to this role.

As the VP of Finance and Business Analytics, Hotlosz will supervise the financial needs and strategy for Becker. Heather's extensive background includes public accounting experience at Barnes Dennig, Deloitte and Touche, and Grant Thornton. In her most recent role as the Controller for McSwain Carpets and Floors, she helped implement an ERP system along with many other process improvements.

"We are fortunate to have Heather join our team during this time of business growth and the ever-changing economic climate. Her experience and skills give us the tools to navigate business challenges and provide us with a strong strategic advantage," says Greg Tankersley, Becker Engineered Systems President. "Her inherent desire for learning and knowledge fits perfectly with our culture, and Heather's drive and agility are essential traits to help facilitate our aggressive growth plans."

In addition to her wide range of experience in the financial industry, Hotlosz holds an MSBA in Taxation and an MBA from Xavier University with Creativity, Innovation, & Entrepreneurship and Values Based Leadership Concentrations. She also has continued additional training and coursework with the AICPA and Goering Center Leadership Development Program.

"I am excited to join the energetic team at Becker Engineered Systems. We have an aggressive, focused growth strategy to execute. Everyone is committed to our core values, especially the core value 'epistemophilia,' which enables us to dynamically serve our customers," says Heather Hotlosz.

Becker is proud to have a varied, satisfied customer base that comes from the decades of industry experience its team holds. The company specializes in pumps, controllers, sensors, customized systems, monitoring, training, and troubleshooting for multiple applications such as cooling towers, boilers, wastewater treatment, specialty chemical feed, hydronics, aquaponics, metal finishing, and irrigation.
